## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05 July 2005 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 21, 26-28, 31-33 and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shanley et al. [US 6,630,682] in view of Wojnarowski et al. [US 6,452,217].

Regarding claims 21 and 26 Shanley et al. disclose a flashlight [10] having an elongated body [12], an ultraviolet lamp [20], a cover [14, 16, 18] and a projection mirror [30] (figures 1-5, column 2 lines 47-64). Shanley does not disclose the ultraviolet emitter including a semiconductor junction.

Wojnarowski discloses an ultraviolet emitter including a semiconductor junction [36] (figures 13-18, abstract).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the ultraviolet lamp of Shanley by the ultraviolet emitter including the semiconductor junction as taught by Wojnarowski for purpose of providing an advantageous way of saving electrical energy and increasing lifetime.

Regarding claim 27, Wojnarowski et al. disclose the ultraviolet emitter without a lens (figure 16).

Regarding claim 28, Wojnarowski et al. disclose a power source [92] (figure 18).

Regarding claim 31, Wojnarowski et al. disclose an ultraviolet emitter [36] including a disc [surface to attached LED die 52] and a reflector area (column 7 lines 26-30).

Regarding claim 32, Shanley et al. disclose a lens [16] (figure 1).

Regarding claim 33, Shanley et al. teaches a set of replacement lenses [16, 18] having different shape and generating different type of beam (figures 1-4, column 2 lines 48-54, column 3 lines 51-55, column 4 lines 36-40).

Regarding claim 35, Wojnarowski et al. disclose the semiconductor junction being mounted in a metallic package [34] (figures 5-7, column 4 lines 55-58).

4. Claims 25, 29 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shanley et al. and Wojnarowski et al. in view of Visciano [US 4,495,550].

Regarding claims 25, 29 and 30, Shanley and Wojnarowski et al. disclose a housing body [83] but do not disclose the body being flexible or the body including the rigid portion and the flexible portion.

Visciano teaches the use of a flexible housing body [22] and a rigid body [12] to allow the flashlight to change shape (figure 2, column 2 lines 16-25).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the housing body of Wojnarowski et al. with the flexible housing body as taught by Visciano to change the flashlight body shape for purpose of providing a design shape configuration.

#### ***Allowable Subject Matter***

5. Claims 22-24 and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Claim 22, the cover is a quartz element attached to the elongated body.

Claims 23-24 are dependent on claim 22.

Claim 34, the lens is made of quartz.

The limitations discussed above are neither disclosed nor suggested by the prior art of record.
